Diagnostic Value of Biomedical Imaging in Obstetrics and Gynecology

Message from the Guest Editors

Biomedical imaging is essential in obstetrics and gynecology (OB/GYN), providing crucial non-invasive visualization and assessment of obstetric, gynecological, and reproductive conditions. Recent research emphasizes enhancing diagnostic accuracy, minimizing risks, and incorporating innovative technologies. Key areas of focus include advancements in 3D and 4D ultrasound technology, the role of MRI in OB/GYN, enhanced imaging techniques for high-risk pregnancies, and the integration of various imaging modalities. This Special Issue seeks to highlight recent advances in biomedical imaging within obstetrics and gynecology. We invite authors to submit systematic reviews, meta-analyses, clinical outcome studies, or reports on new imaging techniques relevant to this field. We look forward to receiving your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
