The Antimicrobial Peptides and Their Therapeutic Potential

Message from the Guest Editor

The Special Issue of this journal, titled "The Antimicrobial Peptides and Their Therapeutic Potential", explores the critical role of antimicrobial peptides (AMPs) and their promising therapeutic applications. AMPs are naturally occurring molecules that play a pivotal role in the innate immune system, defending against various pathogens, including bacteria, viruses, and fungi. This Special Issue delves into the multifaceted aspects of AMPs, encompassing their mechanisms of action, structural diversity, and their ability to combat drug-resistant microbes. Furthermore, it highlights the potential of AMPs in developing novel treatments for infectious diseases, offering a ray of hope in the battle against antibiotic resistance. Contributions in this Special Issue will discuss the latest research findings, clinical trials, and innovative strategies for harnessing AMPs' therapeutic potential. By shedding light on the remarkable properties and applications of these peptides, this collection of articles seeks to advance our understanding of AMPs and pave the way for novel antimicrobial therapies, addressing one of the most pressing challenges in modern medicine.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
