Updates in Orthognathic Treatment

Message from the Guest Editor

Orthognathic treatment is an interdisciplinary approach that implies a critical collaboration between orthodontists and surgeons from the very beginning. In recent years, it managed to correct many severe dentofacial problems that were once considered impossible to solve. Even though the early form of treatment dates back more than 100 years ago, the greatest breakthroughs have happened in the last six decades: the sagittal split ramus osteotomy and the development of the LeFort I down fracture techniques. These two represent the beginning of the modern era of orthognathic surgery. For this Special Issue, we would like to focus on:

- Computer simulations and current computer prediction programs;
- Esthetic and psychosocial considerations;
- Special considerations in the planning of surgical treatment;
- Presurgical orthodontics, presurgical records, and post-surgical orthodontics;
- Timing of surgery;
- Contemporary orthognathic surgery techniques;
- Adjunctive facial procedures to improve soft tissue contours;
- Post-surgical long term stability;
- Orthognathic surgery and temporomandibular joint (TMJ) disorders.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
