Diagnosis and Treatment of Obstructive Sleep Apnea

Message from the Guest Editors

Obstructive sleep apnea (OSA) is a complex disorder with a multifactorial and incompletely understood etiology. It is a part of the syndrome of sleep-disordered breathing, characterized by increasing limitation of airflow through the upper airways, sometimes resulting in complete obstruction of the airway. Although there are various diagnostic options, questionnaires, and feasibility studies available to assess clinical parameters in diagnosing OSA and determining the severity of the disease, overnight polysomnography represents the gold standard in diagnosing OSA. In adults, treatment for OSA most often involves multi-level surgery and CPAP treatment. In children, a large percentage of OSA cases are resolved with surgery, tonsillectomy and adenoidectomy. This Special Issue will provide a comprehensive overview of all diagnostic and therapeutic options for treating OSA in both adults and children, as well as the latest research findings in this area. Our goal is to compile the most recent insights into the diagnosis and treatment.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
