

Special Issue

Advances in the Clinical Treatment of Adult Spinal Cord Injury and Rehabilitation Medicine

Message from the Guest Editor

[*] Aim and scope of the Special Issue: The aim and scope of this Special Issue of *Medicina* is to disseminate the most important information about the latest therapeutic and rehabilitation methods of Traumatic spinal cord injury (SCI), their interconnection, and innovative diagnostic and prognostic tools. In the field of spinal cord injury, high-quality preclinical research and innovative development are advancing to further improve patient care and outcomes, and to contribute to enhancing today's postoperative care and rehabilitation. [*] Cutting-edge research:

- Role of novel diagnostic and surgical techniques in optimizing clinical outcomes.
- Development of modulators for neuroprotection.
- Introduction of novel outcome prediction models based on new digital technologies.
- Biological and biotechnological approaches to neuronal regeneration.
- Case-based rehabilitation models tailored to patient needs.

Guest Editor

Dr. Siegmund Lang

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
