Antimicrobial Resistance, and Stewardship

Message from the Guest Editor

In the never-ending battle of microbes versus antimicrobials, microbes appear to be winning, with the pipeline of novel antimicrobials nearing its end. Due to the inappropriate use of antibiotics, antimicrobial resistance (AMR) is a rising threat, having caught the attention of international and national organizations. Reducing antimicrobial resistance while maintaining the efficacy of antimicrobials is the goal, and the instigation of antimicrobial stewardship programs (ASPs) appears to be the best way to achieve this aim.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
