# Percutaneous Interventions in Ischemic Heart Disease in the Course of Coronary Atherosclerosis — Current State of Knowledge, New Methods and Devices

## Message from the Guest Editor

This Special Issue centers on covering the latest trends and achievements in interventional cardiology, both in the treatment of acute coronary syndrome and patients with chronic coronary syndromes. Publications in the area of treatment novelties relating the field of new imaging devices and those used during interventions and pharmacological treatment are particularly welcome. This also applies to the rapidly expanding treatment offer for patients with a reduced left ventricular ejection fraction and multivessel disease who are not qualified for cardiac surgery, mainly refers to the rapidly growing portfolio of devices for plaque ablation and modification, as well as stentless techniques, including drug-eluting balloons.

# **About the Journal**

## Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

## **Editor-in-Chief**

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

#### **Author Benefits**

## **Open Access:**

free for readers, with article processing charges (APC) paid by authors or their institutions.

### **High Visibility:**

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

### **Journal Rank:**

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
