

Special Issue

Advances in Cancer Therapy from Research to Clinical Practice—Surgical, Molecular or Systemic Management of Cancer: 2nd Edition

Message from the Guest Editors

Thank you all for submitting such a large number of original articles to the previous successful Special Issue. The now-former Special Issue is the result of your hard work, and an opportunity for the research community to benefit from your valuable experience. Due to increased visibility and demand, and with the impressive and essential support of *Medicina*, we propose a second Special Issue with the same title and objectives: to facilitate original and significant research that ranges from fundamental concepts to clinical experience. The relevance of the research could be represented by the addressed pathology, methodology, originality, visibility and citations. The avalanche of new data in cancer therapy makes it hard to determine what is essential. Here, you and your team can present your data, which could be helpful to clear up an intriguing question or explain a real-life clinical experience. We invite you to participate in this Special Issue of *Medicina* in order to facilitate the presentation of your research or institutional experience of treating cancer patients.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
