

## Special Issue

# Prenatal Diagnosis, Management and Postnatal Outcome in Fetuses

### Message from the Guest Editors

Pregnancy care through the application of screening and diagnostic methods has seen a spectacular evolution in the last decades. Fetal medicine usually requires the formation of a multidisciplinary team to evaluate the particularities of the case. Depending on the detected fetal pathology, it is essential to apply, where possible, an appropriate therapy to improve the fetal prognosis. These cases require more careful monitoring of the pregnancy and establishing the optimal moment to complete the course of the pregnancy to provide the best fetal outcomes. Information and communication with the patient and the relatives are essential in managing these cases. This Special Issue aims to offer the possibility of disseminating medical information related to this topic, thereby realizing the potential of an actual exchange of experience between specialists in perinatal medicine from all over the world. The Special Issue collects original research, manuscripts, short communications, reviews, and case reports.

### Guest Editors

Dr. Elena S. Bernad

Department of Obstetrics and Gynecology, "Victor Babes" University of Medicine and Pharmacy, Timisoara, Romania

Dr. Tibor Novák

Obstetrics and Gynecology Department, University of Szeged, Szeged, Hungary

### Deadline for manuscript submissions

closed (1 January 2024)
