Update on Orthopedic Anesthesia

Message from the Guest Editors

This update on anesthesia for orthopedic surgery will focus on clinical innovations that will influence the future direction of anesthesia for orthopedics, with a special emphasis on interventions that produce meaningful outcomes. Anesthesia in orthopedic surgery enables a wide range of approaches. Peripheral nerve blocks are particularly important due to their advantages in reducing hemodynamic factors and effectively managing postoperative pain, as well as improving the care of fragile patients. Authors are welcome to submit original articles, reports on novel treatment strategies and advances in decision making, clinical outcome studies, comparative studies, narrative reviews, scoping reviews, systematic reviews, and meta-analyses.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
