Special Issue

Advances in the Diagnosis and Treatment of Type 2 Diabetes Mellitus

Message from the Guest Editors

The landscape of type 2 diabetes diagnosis is evolving rapidly with the advancements in technology and methodologies aimed at improving patient outcomes through more accurate and user-friendly monitoring solutions. These innovations not only enhance disease management but also hold promise for earlier detection and intervention. This Special Issue aims to present the latest research findings in type 2 diabetes. Authors are encouraged to submit review/systematic reviews, meta-analysis papers, or original research articles focusing on new diagnostic markers for type 2 diabetes and its complications, nanotechnology as a tool for early diagnosis, continuous glucose monitoring, new drug classes, bariatric surgery, and gut-brain axis approaches for managing type 2 diabetes.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
