Current Issues and Developments in Bariatric and Metabolic Surgery for Severe Obesity

Message from the Guest Editor

Severe obesity is an increasing problem worldwide and a leading cause of early mortality and health concerns. Bariatric and metabolic surgery is a safe and effective treatment with excellent long-term results regarding weight loss, comorbidity, and disease prevention. Bariatric surgery continues to develop, in terms of safety, indications, and improved outcomes. Endobariatric surgery is a subsequent new subset of bariatric interventions that have been shown to have promising outcomes. This Special Issue aims to promote current research into updates, new issues, or developments in bariatric and endobariatric surgery and treating obesity. We are soliciting all cutting-edge papers on bariatric and metabolic surgery, endobariatric treatments, and obesity and its management.

Guest Editor

Dr. Andrew G Robertson

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
