

Special Issue

Recent Advances in Coronary Heart Disease and Related Complications

Message from the Guest Editors

This Special Issue explores the latest advancements in diagnosis, prevention and treatment of coronary heart disease, as well as encountering both short- and long-term related complications and we would like to warmly invite you to submit your original research or review articles. Coronary heart disease continues to be a major contributor to global morbidity and mortality. Ongoing research into risk stratification, innovative therapeutic approaches, and the interplay between CHD and comorbidities is steadily transforming clinical practice. We especially encourage the submission of interdisciplinary work, translational studies, and clinical trials. Furthermore, we encourage the submission of preclinical and clinical research, as well as narrative and systematic reviews, on the field of personalized medicine towards diagnosing and preventing coronary heart disease. The implementation of genomics, metabolomics and proteomics is highly increasing in cardiovascular disease. Technology also in the field of interventional cardiology is widely expanding. This Special Issue aims to provide clinicians and researchers with up-to-date knowledge and innovative strategies.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
