Evolving Concepts in Implant Dentistry

Message from the Guest Editor

Following the invention of the "osseointegration" phenomenon by Professor Branemark, dental implantology has rapidly evolved into the standard of care in the treatment of tooth loss. Thanks to a cascade of clinical and technological advancements, many cases that were not treatable by means of a fixed prosthesis in the past can now be rehabilitated seamlessly with implant-supported fixed prostheses. Any newly evolving discipline requires the output of robust science provided by proper research results, thereby fulfilling the information gaps that eventually became the clinical guide. With this Special Issue, I invite researchers and clinicians to contribute to this magnificent field with original research that will be the foundation for the upcoming advancements, improving the lives of many patients.

Guest Editor

Prof. Dr. Volkan Arisan

Department of Oral Implantology, Faculty of Dentistry, Istanbul University, Istanbul, Turkey

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
