Non-Small Cell Lung Cancer (NSCLC): Molecular Markers, Immune Therapy and Targeted Therapy

Message from the Guest Editors

Lung cancer is one of the most common forms of cancer and a major cause of cancer deaths globally, with Non-Small Cell Lung Cancer (NSCLC) being the most prevalent subtype. In recent decades, advances in molecular profiling and immuno-oncology have transformed the treatment landscape for lung cancer. However, the response to therapy and disease progression, as well as long-term outcome, is highly heterogeneous. Thus, studies addressing the biological, clinical, and translational features of NSCLC remain an urgent need.

This Special Issue that aims to provide a compilation of current data regarding novel targets and clinical approaches and highlight the role of precision medicine in early-stage, advanced, and metastatic disease settings. We welcome purification papers pertaining to molecular alterations, rare oncogenic driver mutations, and immune-based therapy. Including, but not limited to, the following topics: liquid biopsy and ctDNA assessment, radiogenomics, primary and acquired resistance mechanisms, and innovative real-world combination regimens. We particularly welcome translational work that has a basis in clinical translation.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
