Lung Injury and Acute Respiratory Distress Syndrome: New Insights into Mechanisms and Emerging Therapies

Message from the Guest Editors

Acute respiratory distress syndrome (ARDS) remains a major cause of morbidity and mortality in critically ill patients, and there are still limited effective treatment options, despite decades of research. Through this Special Issue, “Lung Injury and Acute Respiratory Distress Syndrome: New Insights into Mechanisms and Emerging Therapies”, we aim to advance our understanding of the pathophysiology behind ARDS, as well as emerging therapeutic options. We welcome papers on topics ranging from the molecular and cellular mechanisms of inflammation underlying this syndrome to emerging pharmacological and supportive therapies. By highlighting recent advances and identifying key knowledge gaps, this Special Issue will support the development of more effective and targeted approaches to preventing and treating ARDS in diverse patient populations.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
