The Burden of COVID-19 Pandemic on Mental Health

Message from the Guest Editors

The SARS-CoV-2 pandemic has placed a great burden on healthcare systems around the world, causing significant mortality and morbidity. Nowadays, two years after the onset of the pandemic, there are still large numbers of patients dying from this disease, and even more suffering short- and long-term consequences, affecting almost all organs and systems. In this Special Issue, we aim to gather original articles, reviews or case reports with an emphasis on the burden of the COVID-19 pandemic on mental health. We also welcome articles that consider ethical, social and psychological issues relevant to the field of mental health during the COVID-19 pandemic.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
