Advances in Acute Coronary Syndrome Diagnosis and Management

Message from the Guest Editor

Recent strides in the diagnosis and management of acute coronary syndrome (ACS) have markedly improved patient outcomes. Innovations, such as high-sensitivity cardiac troponin assays and advanced imaging, enhance ACS identification, crucial for timely intervention and mortality reduction. In the management of ACS, there is a notable shift toward comprehensive and personalized approaches. This encompasses the use of antiplatelet agents, anticoagulants and invasive procedures tailored to patient-specific characteristics. The integration of guideline-directed medical therapy with invasive interventions has demonstrated positive outcomes, underscoring the significance of a collaborative, multidisciplinary approach. Involving cardiologists, emergency physicians and various healthcare providers ensures timely and effective care for ACS patients. Exploring novel technologies, treatment modalities and interdisciplinary collaborations will further shape the evolving landscape of ACS care, contributing to ongoing improvements in patient outcomes and overall cardiovascular health.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
