Coping Strategies Across the Lifespan: Psychological and Neuropsychological Perspectives

Message from the Guest Editors

This Special Issue seeks to bring together high-quality research at the intersection of clinical psychological and neuropsychological perspectives, exploring the mechanisms, applications, and translational potential of coping strategies. We welcome original research, systematic reviews, meta-analyses, and theoretical contributions investigating cognitive and emotional regulation, neurobiological pathways, stress adaptation, and interventions designed to enhance coping, resilience, and quality of life in people of all ages and in various professional contexts.
