

Special Issue

Innovations in Pelvic Organ Prolapse Management: From Diagnosis to Recovery

Message from the Guest Editors

This Special Issue aims to explore contemporary advances in diagnosis, surgical repair, and functional rehabilitation of pelvic organ prolapse. Emphasis will be given to evidence-based approaches that improve long-term anatomical outcomes and enhance quality of life, while also reducing morbidity and recurrence. This Special Issue welcomes a wide range of high-quality submissions related to pelvic organ prolapse, particularly in the field of urogynecology, as following:

- **Original research articles** presenting clinical studies, surgical outcomes, or functional evaluations relevant to POP management.
- **Systematic reviews and meta-analyses** that synthesize current evidence and provide guidance for clinical practice.
- **Narrative reviews or expert opinion papers** offering critical perspectives on evolving concepts, controversies, or future directions in the field.
- **Surgical technique descriptions or video articles** demonstrating procedural approaches or innovations in POP repair.
- **Multidisciplinary or translational studies** bridging urogynecology with imaging, physiotherapy, urodynamics.

We look forward to your submissions. ,

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
