

Special Issue

New Advance in Primary and Secondary Immunodeficiencies

Message from the Guest Editors

For this Special Issue of *Medicina* entitled “New Advance in Primary and Secondary Immunodeficiencies,” we will be exploring cutting-edge research and practice changes in the field of inborn errors of immunity and immune dysregulation. This Issue is focused on providing a practical clinical framework for immunologists and other specialties within medicine and research. The field of immunodeficiency is rapidly changing with new therapies and diagnostics now available in addition to the emergence of expanding diseases being discovered. With the increasing availability and awareness of immunogenetics, targeted therapies are now possible for many inborn errors of immunity. Biologics with specific targets for immune dysregulation are enabling a more targeted approach to immune control for a quiescent disease. Furthermore, secondary immunodeficiency, particularly with regard to solid organ and hematopoietic transplantation, malignancy, and immunosuppression, is now being managed more often by the immunologist with personalized therapeutics. This issue will explore these new challenges and advantages in the field of medicine with regard to immunodeficiency.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
