Special Issue

Antimicrobial Stewardship and Antimicrobial Resistance

Message from the Guest Editor

The emergence and spread of antimicrobial resistance (AMR) has become one of the most pressing global health challenges of the 21st century. Historically, the discovery and widespread use of antibiotics revolutionized medicine, drastically reducing mortality from infectious diseases. However, the misuse and overuse of these life-saving drugs in human medicine have led to the rapid development of resistant strains of bacteria, viruses, fungi, and parasites. This resistance threatens to undermine the efficacy of existing antimicrobial agents, making infections harder to treat and increasing the risk of disease spread, severe illness, and death. This Special Issue aims to advance understanding of the mechanisms underlying AMR, evaluate the impact of AMR on public health and ecosystems, and explore innovative approaches to AMS. This Special Issue seeks to foster interdisciplinary collaboration and present evidence-based strategies for reducing AMR, promoting the judicious use of antimicrobials, and enhancing infection control measures.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius

Medical Academy, Lithuanian University of Health Sciences, Kaunas, Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
