Cutting-Edge Research in Dental Implantology: Emerging Innovations and Clinical Advances

Message from the Guest Editors

Over the decades, the field of oral implantology has evolved through continuous improvements in implant design, surgical techniques, and restorative approaches. Advances in the macro- and micro-design of implants, their surface modifications, and digital workflows have redefined the possibilities of treatment planning and patient outcomes. This Special Issue of *Medicina* aims to present the most cutting-edge of these developments, focusing on how implant design and surgical/prosthetic techniques are being reimaged to optimize osseointegration, improve biomechanics, and enhance patient satisfaction. By bringing together evidence from both experimental and clinical research, we seek to provide a platform for the next generation of solutions in implant dentistry. We invite authors to contribute original research articles, systematic reviews, and clinical studies that highlight innovative implant design and advanced treatment protocols. Contributions exploring digital integration, minimally invasive approaches, and novel strategies for overcoming clinical challenges are particularly welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
