Advances in the Diagnosis and Treatment of Coronary Artery and Peripheral Artery Diseases

Message from the Guest Editors

Cardiovascular disease has both a high incidence and an increased mortality worldwide. This is supported by the newest statistics, which also show high rates of diseases of the vessels, either those of the heart leading to coronary artery disease or those of other circulatory pathways leading to peripheral artery disease. Considering these, there is a constant need for medical publications on the topic to either update current knowledge or promote newer concepts regarding optimal patient management (i.e., preventive measures, associated risk factors, revascularization procedures, drug treatments, and patient rehabilitation). We therefore warmly invite and highly encourage your submissions to the “Advances in the Diagnosis and Treatment of Coronary Artery and Peripheral Artery Diseases” of the *Medicina* Journal.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
