Advances in Bypass Surgery in Cardiology

Message from the Guest Editors

The field of cardiac bypass surgery has undergone remarkable advancements over the past decade, driven by innovations in surgical techniques, perfusion technology, and patient management strategies. This Special Issue, titled *Advances in Bypass Surgery in Cardiology*, aims to compile cutting-edge research, clinical studies, and reviews that highlight the latest developments and future directions in this critical area of cardiology. We invite submissions that explore novel approaches for coronary artery bypass grafting (CABG), advancements in minimally invasive surgery, and hybrid procedures that integrate surgical and interventional techniques. Additionally, we welcome research focused on off-pump coronary surgery, aortic surgery, and the optimization of cardiopulmonary bypass techniques. Studies examining the impact of these advancements on surgical outcomes, patient recovery, and long-term cardiac health are also encouraged. We look forward to your contributions.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
