

Special Issue

Updates on Caries Management in the Primary and Permanent Dentition: 2nd Edition

Message from the Guest Editor

Caries is still one of the most prevalent diseases affecting children and adults worldwide. Reducing its prevalence and improving the quality of dental care should be major goals in service of the elevation of oral health-related quality of life. This Special Issue aims to present innovative approaches, high-quality clinical, epidemiological, and health services, and translational research on various aspects of how to manage dental caries (preventive/non-invasive, minimally invasive, and operative approaches) in children and adults. We are soliciting papers that present cutting-edge research in the field of caries management:

- Innovative approaches;
- Clinical research (e.g., RCTs, cohort studies);
- Epidemiological research;
- Health services research;
- Translational research.

Guest Editor

Dr. Julian Schmoeckel

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
