# Advances in the Diagnosis, Prevention and Treatment of Skin Tumors

### Message from the Guest Editor

Skin cancer is not only one of the most frequent forms of cancer, but also one of the most preventable and readily recognizable. Still, in the past three decades, the incidence of no other cancer has risen as much as that of non-melanoma skin cancer, particularly cutaneous squamous cell carcinoma, while the rise in the incidence of melanoma ranked third among all types of cancer. Apart from causing significant morbidity, the mortality rates of skin cancers have remained stable or have shown a slight decrease. There are countless factors responsible for these phenomena, including genetics, increased longevity, various causes of immunosuppression, exposure to toxic agents, ozone depletion and climate change, as well as the results of prevention and early diagnosis campaigns and improved diagnostic tools. Nevertheless, efforts to improve primary prevention and detect skin cancers in an early phase need to be intensified. Our aim is to bring together and support both clinicians and researchers to share their experiences and discuss the results of their innovative studies regarding the prevention, early diagnosis and treatment of skin tumors.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
