Updates on Chronic Heart Failure and Hypertension

Message from the Guest Editors

Heart failure and hypertension are two of the most pressing concerns in the field of cardiovascular care. Despite significant advancements in medication, device-based therapies, and diagnostics, the burden of these diseases is still rising, because of rising comorbidity rates, aging populations, and lifestyle choices.

This Special Issue aims to present the most recent evidence on the intricate relationship between hypertension and heart failure. New pathophysiological processes, identifying biomarkers, developments in imaging and monitoring technologies, and advanced treatment approaches—from device therapy and patient-centered care models to pharmaceutical innovations—are among the subjects we aim to cover. Through showcasing both scientific advancements and real-world difficulties, this Special Issue seeks to give clinicians, researchers, and policymakers a thorough picture of the field's current state and future directions. Ultimately, the objective is to promote greater comprehension, interdisciplinary cooperation, and the conversion of innovative research into better results for patients with chronic heart failure and hypertension.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
