New Advances in Oral Care

Message from the Guest Editors

Oral care is undergoing a profound transformation, driven by advances in clinical and translational research, new technologies, and a deeper understanding of the links between oral and systemic health. Beyond traditional preventive and restorative approaches, the field of oral medicine has emerged as a cornerstone for diagnosing and managing complex oral diseases, including mucosal disorders, potentially malignant conditions, salivary gland dysfunctions, and neuropathic pain syndromes.

This Special Issue aims to highlight novel perspectives in oral care, oral medicine and orofacial pain. We welcome contributions exploring new diagnostic biomarkers, digital and imaging tools, minimally invasive and regenerative treatments, as well as advances in the understanding and management of new chronic oral conditions. Studies addressing the role of the oral microbiome, systemic comorbidities, and innovative therapeutic approaches—including pharmacological and non-pharmacological interventions—are particularly encouraged.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
