Systematic Reviews and Outcomes Research in Emergency Medicine

Message from the Guest Editor

This Special Issue will discuss and share new research at the interface of systematic evidence synthesis and real-world outcomes in emergency medicine. We wish to foster an understanding of the impacts of emergency care in patient-centered outcomes through the use of structured evidence to inform clinical decisions via improved protocols and appropriate policies. This Special Issue will explore and disseminate cutting-edge research at the intersection of systematic evidence synthesis and real-world outcomes in emergency medicine. Our goal is to promote a deeper understanding of how emergency care influences patient-centered outcomes and how structured evidence can inform clinical decisions, improve protocols, and shape policy. We welcome systematic reviews, meta-analyses, scoping reviews, methodological studies, and original investigations pertaining to the outcomes of patients in emergency care settings or pertaining to any aspect of healthcare or quality of care in emergency medicine. In the true spirit of international, multidisciplinary scientific inquiry, we invite you to contribute your perspectives for inclusion in this Special Issue.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
