Recent Advances in the Diagnosis and Treatment of Neurodegenerative Diseases

Message from the Guest Editors

There have been remarkable recent advancements in understanding and treating neurodegenerative diseases such as Alzheimer's disease (AD), Parkinson's disease (PD), amyotrophic lateral sclerosis (ALS), and Huntington's disease (HD), disorders which pose a considerable burden to patients, caregivers, and healthcare systems.

The aim of this edition is to provide new insights into the epidemiology, pathophysiology, risk factors, diagnosis, and management of neurodegenerative diseases, including but not limited to AD, PD with motor and non-motor symptoms, Parkinsonism, ALS, and HD.

Authors are welcome to submit original articles; reports on novel treatment strategies and advances in decision-making; clinical outcome and comparative studies; narrative, scoping, and systematic reviews; and meta-analyses.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
