# Experimental and Clinical Researches in Oral Medicine

## Message from the Guest Editors

Background and history of this topic: Oral diseases have a very high prevalence among humans. At the same time, they are frequently associated with systemic diseases in a bi-directional relationship. Aim and scope of the Special Issue: This Special Issue aims to update the way in which experimental and clinical study designs contribute to the management of oral diseases, in order to optimize contemporary treatment protocols. Cuttingedge research: mRNA assay, salivary research, oral histology and immunohistochemistry, molecular biology, cytokines, viruses involved in oral diseases, and clinical studies of oral medicine. We encourage the submission of original research papers, case reports, systematic reviews, meta-analyses, and narrative reviews.
