Outcomes After Surgical Treatment of Pelvic Organ Prolapse

Message from the Guest Editors

Pelvic organ prolapse (POP) is a condition when one or several pelvic organs descend from their typical position. Although the management of POP might be either conservative or surgical, operations look more attractive to young patients. Especially for those who want a fast result with the smallest efforts. This leads to a situation where operations for POP are performed earlier in life than it used to be.

According to various studies, the recurrence of prolapse after the surgical treatment of POP varies from 13 % to 58%. This means that the earlier in life the operation is performed, the greater the risk is that the patient will be treated for the relapse of pelvic organ prolapse again later in life. Therefore, it is vital to choose not only between the conservative or surgical management of POP but also between various operations that have been developed to treat prolapse.

The aim of this Special Issue is to review the different methods of the surgical treatment of POP and the outcomes after applying them, with a particular focus on the recurrence of POP.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
