

## Special Issue

# Clinical Management of Hip Fractures

### Message from the Guest Editor

This Special Issue, entitled "Clinical Management of Hip Fractures", provides a comprehensive overview of current strategies and innovations in the diagnosis, treatment, perioperative care, and rehabilitation of individuals experiencing hip fractures. Topics of interest include, but are not limited to, fracture classification, surgical techniques, anesthesia approaches, the management of comorbidities and complications, rehabilitation strategies. This Special Issue also welcomes research on multidisciplinary care models, orthogeriatrics, osteoporosis management, and strategies to prevent secondary fractures. Emphasis is placed on evidence-based practices and emerging technologies that may enhance patient recovery, reduce healthcare costs, and improve long-term outcomes. Professionals from different backgrounds—including orthopedic surgeons, geriatricians, anesthesiologists, nurses, multidisciplinary rehabilitation teams, and other related fields—are encouraged to submit their innovative original research articles and reviews.
