

## Special Issue

# Global Perspectives on Sepsis: Epidemiology, Awareness and Treatment Strategies

### Message from the Guest Editor

- Sepsis, a life-threatening condition resulting from a dysregulated host response to infection, has been a significant global health concern for decades. Despite advances in medicine, sepsis continues to cause substantial morbidity and mortality worldwide, particularly in low- and middle-income countries. The condition has complex etiologies, making it difficult to diagnose and treat, especially in resource-limited settings. Development of protocols such as the "Surviving Sepsis Campaign."
- This Special Issue, *Global Perspectives on Sepsis: Epidemiology, Awareness and Treatment Strategies*, will provide a comprehensive platform for discussing the latest developments in sepsis research, prevention, and management. By integrating insights from epidemiological studies, clinical advancements, and public health efforts, this Special Issue will address global disparities in sepsis outcomes and resource allocation. It emphasizes the importance of innovative diagnostic tools, effective treatment protocols, and global awareness campaigns for reducing the burden of sepsis.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.
