Diagnosis, Evaluation, and Management of Diseases during Pregnancy: Part II

Message from the Guest Editors

How an individual's associated comorbidity can affect their pregnancy has always been an essential concern of medical specialists. The presence of these health conditions, no matter how minor, requires additional evaluation and appropriate treatment to avoid complications. They can worsen throughout the gestation period, influencing maternal health status, the evolution of pregnancy, and the outcome of birth. The perinatologist will evaluate the pathology in collaboration with the specialist to reach the most favorable outcome for the patient and the fetus. The purpose of this Special Issue is to share current management strategies regarding maternal-associated pathology from personal acquired experience and guidelines worldwide. This Special Issue allows specialists worldwide to make public results of state-of-the-art research in prenatal care in cases with comorbidities. This Special Issue collects papers that reflect further progress in this field in the form of original research manuscripts, reviews, and case reports.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
