

Special Issue

Recent Research and Trends in Plastic, Aesthetic and Regenerative Surgery

Message from the Guest Editors

In this Special Issue, we aim to gather the most recent articles from all areas of Plastic Surgery, including interdisciplinary topics. While maintaining scientific rigor, we want to encourage authors to express their new approaches and results, even preliminary ones, and also to encourage them to build working hypotheses that will be subsequently validated. The presentation of avant-garde works is usually done within scientific events, but dedicating a Special Issue of a journal offers a special opportunity due to the much wider access it offers. Also, the objective of this Special Issue is to analyze some aspects within systematic or comprehensive reviews regarding the fastest evolving topics in the field. Equally important are rare cases that are often missed because they cannot be included in a series with standard statistical significance. For these reasons, we encourage potential authors to publish significant case series of rare pathologies. Finally, the scientifically supported opinions of authors are welcomed, even if they do not fit the mainstream opinion. What kind of papers we are soliciting: Article, Review, Systematic Review, Case Series, Hypothesis, Opinion.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
