Optimizing Outcomes in Head and Neck Surgery

Message from the Guest Editors

In otolaryngology and head and neck surgery, the goal of the diagnostic and therapeutic approach is to achieve a good physical and functional outcome. Functional surgery in ENT pathology aims, as appropriate, to restore hearing, nasal permeability, and smell. Cochlear implants in children and adults made huge progress in restoring hearing. Oncological surgery of the head and neck through the ablative time aims at a resection with negative margins of tumors of the pharynx, larynx, or cervical tumors. Alternatively, through reconstructive time, the aim is to restore some fundamental functional elements, such as anatomical breathing, swallowing, and phonation. Improving functional prognosis in head and neck surgery is an essential goal of clinical and research activity. We are pleased to invite you to contribute to this new Special Issue with manuscripts reflecting new directions in optimizing outcomes in otorhinolaryngology and head and neck surgery. We welcome original articles, but also reviews and selected rare case series, with the goal of updating our knowledge on this topic.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
