

## Special Issue

# New Advances in Complex and Minimally Invasive Surgery Related to Spine

### Message from the Guest Editors

Post COVID marks an era of medical evolution which demands efficient healthcare systems to optimize hospital bed usage. Spine surgery has evolved in the last few decades to meet this increasing demand of gaining access to previously difficult-to-access targets, achieving optimal targeting of decompression and stabilization of the spine with less tissue trauma and collateral soft tissue damage. Our Special Issue targets advances in spinal techniques in (1) getting more accurate placement of screws through navigation and robotics in spinal segments, (2) gaining access to ventral, lateral and posterior approaches using spinal endoscope specialized retractor systems, (3) using specialized technique equipment to minimize soft tissue damages and reduce morbidity in complex spinal operations in adults and paediatric spinal surgery, (4) using 3D-printed models and moulds to aid in surgical planning and (5) the use of augmented reality to provide precise and efficient spinal surgeries. We look forward to receiving articles with cutting-edge research on topics related to advances in complex and minimally invasive spine surgery.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
