

Special Issue

Research on Allergy, Asthma, and Clinical Immunology

Message from the Guest Editors

Allergies affect individuals of all ages, appearing in about one-fourth of the global population, while asthma is the most common chronic disease among children. Atopic diseases such as allergic rhinitis and atopic dermatitis greatly impact quality of life, while anaphylaxis is a life-threatening situation. The continuous advancement of biomedical sciences has provided significant progress in improving the diagnosis and therapy of allergic diseases.

This Special Issue aims to collect selected reviews and original data on research on all topics of Allergy, Asthma and Clinical Immunology, in both children and adults. Studies on molecular diagnosis of allergies, diagnostic advances for asthma and allergic rhinitis, and other diagnostic procedures used for allergy are encouraged. Clinical studies on atopic diseases, drug allergy, Hymenoptera venom allergy, angioedema, urticaria, mast cell disorders and anaphylaxis are welcomed. Studies on the treatment of atopic and other allergic diseases may include the use of biologicals, allergen immunotherapy, drug repurposing, new protocols, clinical trials, and emerging issues on their safety and efficacy.

Guest Editors

Dr. Constantinos Pitsios

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
