Advances in Research on Oral and Periodontal Surgery, Biomaterials, and Oral Disease Management

Message from the Guest Editors

The practical, contemporary, and evidence-based therapy/surgical approaches for treating periodontal and peri-implant tissues, including advanced forms of periodontal and peri-implant diseases and reconstructions, gingival recession, and complex cases requiring interdisciplinary management, are the most critical topic in this field. The research in this field focuses on the key points in periodontal therapy, i.e., diagnosis and prognosis, and presenting decision trees that can be useful in daily practice.

Articles on resective and/or regenerative techniques for the treatment of periodontitis/peri-implantitis and mucogingival surgical procedures for the management of soft tissue deficiencies will be considered for this Special Issue. Interdisciplinary care will be considered, which is of key importance when periodontal treatment is needed in cases requiring orthodontic, endodontic, oral rehabilitation, and restorative therapy.

This Special Issue covers a large research field in periodontology, with a specific focus on research involving oral and periodontal surgery, biomaterials, and the management of oral disease, exposing diagnosis, treatment planning, and outcomes.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
