Latest Findings in Diagnosis and Treatment of Gynecological Malignancies—2nd Edition

Message from the Guest Editor

The mortality and morbidity of Gynecological cancers have been on a downward trend in recent years, thanks to technological advances in surgery, oncology, and palliative care. This Special Issue comes in the light of major and groundbreaking scientific discoveries that have revolutionized the approach to major gynecologic oncologic diseases. The increasing spread of robotic surgery, as well as the refinement of laparoscopic instruments, offer new technical horizons previously difficult to imagine. Further, the growing knowledge regarding the molecular signature of gynecological cancer and radio diagnostic advantages offers physicians the opportunity to diagnose and treat gynecological cancer early and personalize treatment. Finally, a not insignificant aspect in the management of gynecologic oncology patients is the important scientific progress that has occurred with the application of ERAS protocols and the optimization of palliative care. We, therefore, invite our authors to contribute their most important testimonials in the form of case reports, original articles, review articles, and meta-analyses.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
