

Special Issue

Chronic Liver Diseases in Liver Surgery and Anesthesia

Message from the Guest Editors

We are inviting you to contribute to a Special Issue on the interesting topic of chronic liver diseases and liver surgery, including the management of vulnerable patients undergoing liver transplants and other types of surgery. This Special Issue aims to highlight new diagnostic and therapeutic concepts in chronic infectious and non-infectious liver diseases, their modern monitoring, the management of various complications of liver cirrhosis, and the importance of a multidisciplinary approach (non-surgical, interventional radiology, and surgery) in malignant neoplasia of the liver. Furthermore, high-quality research on novel prognostic biomarkers and prediction scoring systems in chronic liver disease is warmly welcomed. All studies that focus on liver surgery, including liver transplant experiences, are welcome. We are delighted to invite you to submit your papers to this Special Issue and look forward to reviewing them.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
