

## Special Issue

# Combined Anterior Cruciate Ligament Reconstruction and Lateral Augmentation

### Message from the Guest Editors

Anterior cruciate ligament (ACL) rupture is one of the most common musculoskeletal injuries in sports that involve cutting and pivoting, particularly among young athletes. This injury often results in knee instability, and surgery is typically required for anterior cruciate ligament reconstruction (ACLR). While all reconstruction techniques have proven effective in restoring anteroposterior stability, they do not always succeed in restoring normal tibial rotational kinematics. Rotational knee stability is crucial for patients in returning to sport, improving their knee function, and achieving satisfaction with their results. This Special Issue will feature a range of articles that explore common applications of anterior cruciate ligament reconstruction (ACLR) combined with lateral augmentation. Experts around the world with a strong interest in ACL reconstruction, clinical outcomes, and procedural efficiency are invited to contribute to this Special Issue, share valuable knowledge and extensive experience, and provide orthopedic surgeons with a unique educational resource and opportunity when it comes to incorporating these complex procedures into daily practice.

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
