

## Special Issue

# Array Comparative Genomic Hybridization and Next Generation Sequencing in Molecular Diagnostics of Genetic Diseases: Novel Applications and Future Perspectives

### Message from the Guest Editors

In recent years, molecular diagnostics has become even more important in clinical settings due to the availability of highly sensitive technologies, such as array CGH and NGS, which provide the detection of molecular alterations with a higher resolution, accuracy, and specificity. As a consequence, the study of genetic diseases has been enhanced, and an increasing number of tests and tools are now available to better understand and define not only mechanisms underlying disease onset but also to design novel therapeutic strategies. *Medicina* is launching a Special Issue with the aim to provide a comprehensive view of the state of the art and future perspectives of molecular diagnostics also based on novel technological approaches. We are pleased to invite you and your co-workers to submit your original research articles reporting on the use of advanced molecular technologies for both the in-depth study of intriguing medical cases and the routine use of these diagnostic tools. We would also like to invite you to submit review articles aimed at providing a comprehensive overview of recent advances in molecular diagnostics.

---

### Guest Editors

Prof. Dr. Valeria D'Argenio

1. Department for the Promotion of Human Sciences and Quality of Life, San Raffaele Roma Open University, 00166 Rome, Italy

2. CEINGE-Biotecnologie Avanzate Franco Salvatore, 80145 Napoli, Italy

Dr. Barbara Lombardo

Dipartimento di Medicina Molecolare e Biotecnologie Mediche, Università degli Studi di Napoli "Federico II", 80131 Napoli, Italy

## About the Journal

### Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

### Author Benefits

#### Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

#### High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

#### Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
