Autism Spectrum Disorder in Children with Complex Presentations

Message from the Guest Editor

In recent years, there has been more research exploring the challenges of assessing and providing treatment and support for children on the autism spectrum and their parents when they have complex presentations. In November 2018 there was a large conference at Great Ormond Street Hospital, where experts from around the world presented. The large interest in this topic has led to a groundswell of opinion that it would be helpful to have a special journal edition that published a number of expert papers on this topic in one place. This could include presentations of autism spectrum disorder in people who are deaf or blind or who have another disorder such as tuberous sclerosis or a syndrome (e.g., CHARGE or fragile X syndrome), or where there are other co-morbidities such as profound anxiety, psychosis, or learning disability.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
