

Special Issue

Autoimmunity and Vaccines

Message from the Guest Editors

This Special Issue will discuss how infection can induce autoimmune diseases, mainly by hyperstimulation of the immune system of genetically prone people. An emphasis will be put on molecular mimicry. COVID 19 will be a case in point with 12 autoimmune diseases induced by the virus, as well as 15 divers of autoantibodies. The issue will cover the impact of vaccines with molecular mimicry and aluminum as an adjuvant, the advantage of mRNA, and who should be aware of vaccines and what to do when autoimmune diseases emerge. There will also be descriptions of how to prepare a better and more safe vaccine. Cytokine storms, mechanisms, and how to avoid them, will also be discussed. Prof. Dr. Yehuda Shoenfeld

Guest Editors

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
