Innovation in Otorhinolaryngology: Head and Neck Surgery

Message from the Guest Editors

In the context of hearing and auditory disorders, cochlear implants and other hearing restoration technologies have transformed the lives of individuals with profound hearing loss, enabling them to regain a sense of sound. Overall, the field of Innovation in Otolaryngology: Head and Neck Surgery is marked by continuous progress, driven by interdisciplinary collaboration and a commitment to enhancing patient well-being via state-of-the-art techniques and technologies. Considering the increasing complexity and technological progress in recent years, and its impact on clinical practice, *Medicina* is launching a Special Issue entitled "Innovation in Otorhinolaryngology: Head and Neck Surgery", with the aim of gathering together accurate and up-to-date scientific information on all aspects of innovative thinking in surgical improvements and research. We are pleased to invite you and your co-workers to submit your original research, review or commentary articles addressing innovations in otorhinolaryngology and head and neck surgery. We encourage the submission of original manuscripts spanning basic to clinical research.
