Endometrial Cancer: Biomarkers and Management

Message from the Guest Editor

Over the last 15 years, a substantial improvement has been observed in terms of precise diagnostics of endometrial cancer, leading to changes in clinical management. As precision medicine advances and is associated with higher financial costs of clinical management, we should explore possible solutions for avoiding huge disparities in patients' access to all treatment modalities and to clinical trials.

To present a review of what is known and expected in biomarker development, clinical management of endometrial cancer patients, access to novel treatment and to published results of new studies. Reviews would be focused on specific populations (e.g., the elderly, a fertility-sparing setting, and non-endometrioid cancer) and translational research (overview, what is expected in near future) as well as in targeted therapies. Reviews would also include disparities in access to clinical trials and novel therapies.

We invite you and your colleagues to submit your articles reporting on this topic. Review articles, original research articles, and case reports (only if of the highest quality and clinically important) are all welcome.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
