

Special Issue

Chronic Rhinosinusitis with Nasal Polyps: Latest Trends in Diagnosis and Treatment

Message from the Guest Editors

With a focus on CRSwNP, this Special Issue proposal discusses crucial aspects of diagnosis, multidisciplinary care, and therapy developments. The goal of this issue is to give a thorough review of the most cutting-edge methods and best practices currently used in clinical practice.

We also aim to explore how important it is for multidisciplinary teams to work together to optimize treatment plans and enhance patient care. Case studies and expert perspectives will be used to analyze this collaborative approach, presenting effective examples of interdisciplinary teamwork with allergologists, radiologists, immunologists, and pneumologists.

Thus, in conjunction with the advent of new biological therapies indicated for CRSwNP, to promote their most appropriate and integrated application with the "standard of care", it is necessary to build a theoretical-practical training path to develop knowledge and skills around the new evidence and management of this pathology.

About the Journal

Message from the Editor-in-Chief

You are invited to contribute a research article or a comprehensive review for consideration and publication in *Medicina* (ISSN: 1648-9144). *Medicina* is an open access, peer-reviewed scientific journal that publishes original articles, critical reviews, research notes, and short communications on medicine. The scientific community and the general public can access the content free of charge as soon as it is published.

Editor-in-Chief

Prof. Dr. Edgaras Stankevičius
Medical Academy, Lithuanian University of Health Sciences, Kaunas,
Lithuania

Author Benefits

Open Access:

free for readers, with article processing charges (APC) paid by authors or their institutions.

High Visibility:

indexed within Scopus, SCIE (Web of Science), PubMed, MEDLINE, PMC, and other databases.

Journal Rank:

JCR - Q1 (Medicine, General and Internal) / CiteScore - Q1 (General Medicine)
